

Ship flies into frame, camera pans to follow

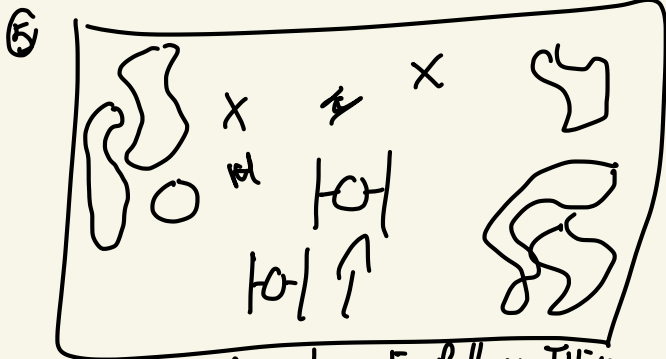

camera follows sub x-wing through asteroid field, in the distance x-wings & tie fighter battle

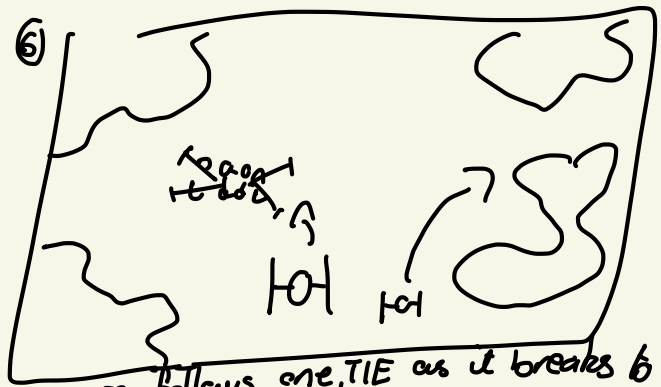

x-wing banks right sharply, the camera stays put & begins to pan left to follow a squad of 3 TIE's around the asteroid field, one of them crashes

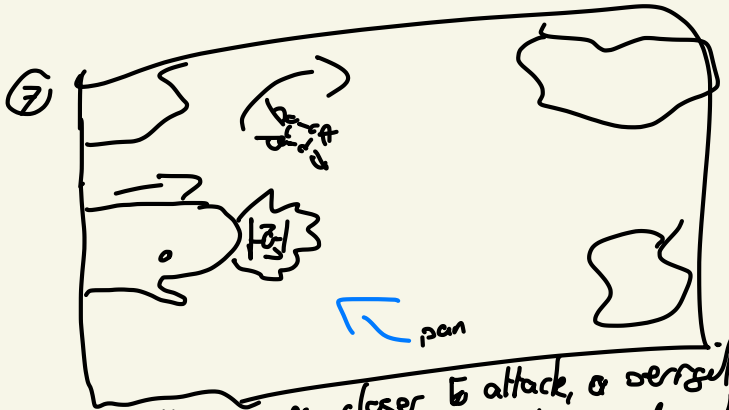

TIE's loop through a gap in a large asteroid, moving under it and heading back toward the right. They bank to one side as they complete the turn, so as not to end up upside down

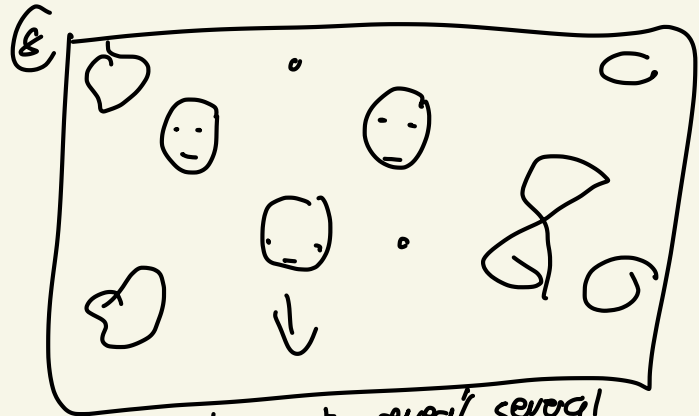

camera tracks to follow TIE's  
back into the fray

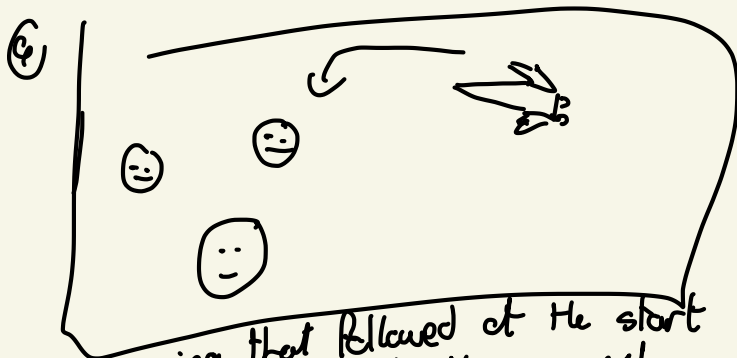

camera follows one TIE as it breaks to  
attack an X-wings.

as the X moves closer to attack, a verigil  
(space whale) moves out of blindside and  
destroys the TIE as the X peels off

camera turns to reveal several  
verigil coming out of hyperspace

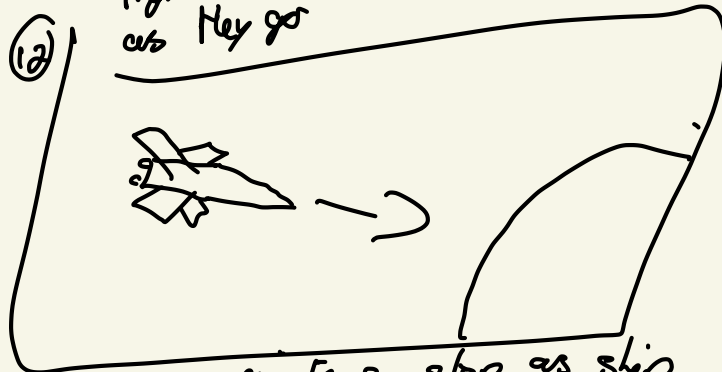

x-wing that followed at the start  
falls in line with the perrigil,  
camera now to follow behind again

Camera moves away from x-wing to  
travel through different parts of the  
Right, as perrigil + ships move on

The perrigil + wings join the  
Right moving around obstacles  
as they go

camera moves to a stop as ship  
travels toward front of planet
